

Company Profile

ABN: 90 613 105 721

Britto's Earthmoving & Plant Hire is a small family owned business run by John and Cathy Brittain in Port Augusta South Australia.

Britto's has key clients throughout SA. We pride ourselves on honesty and integrity and will let you know straight away if we can or cannot supply support for your projects or are able to reschedule to your needs. We also pride ourselves on safety and efficiency which in turn supports our client's values and management systems.

John was born here in Pt Augusta starting work with Highways Dept. (now D.P.T&I) on the Stuart Hwy before venturing west and taking up mining, resource infrastructure construction and civil earthworks across WA, QLD and Papua New Guinea. Along the way John has achieved a WA Quarry Managers Certificate, and various other mining and civil construction qualifications to enhance his career and experience.

Britto's enjoy a healthy long-term relationship with local and regional Indigenous land owners and actively employ qualified and skilled Indigenous operators and drivers. In particular the Barngarla traditional land owners. Our local employment focus always considers Local Indigenous candidates first.

Our business values are to work safely, work with our clients to ensure a win-win for both parties, local employment opportunities and to ensure an open line of communication at all times.

Please see the following lists of capabilities and mobile plant that we currently have available or will be coming available in the near future. All of our mobile plant is preferably wet hired, low hours and fully mine compliant. All plant is generally available ex our depot in Pt Augusta. We also have the ability to source and supply project specific mobile equipment and accessories. No job is too small or too big!

Safety

Britto's management and employees take safety very seriously. We are in the final stages of implementing a new "Safety Management System" called STEMS.

www.stems.com.au

STEMS cover all areas of safety management plus interacts with some HR functions, health (medicals etc), licensing and certificates of competencies and a range of other support functions.

With STEMS in place management and employees will be able to access STEMS from the field and also via the new STEMS App from their mobile phones.
